AHMAD AYUB NU'MAN

SOFTWARE ENGINEER

Full-Stack Web Systems • REST APIs & Microservices • PostgreSQL / MySQL • GCP & Docker • Redis Caching

ayb.n1994@gmail.com • +62 895 3491 77555 • linkedin.com/in/ayub-numan-871406155 • github.com/ayebe51 • portfolio-seven-theta-bovx80a70x.vercel.app

📍 **Indonesia (Open to Hybrid / On-Site in Jakarta / Remote)**

PROFESSIONAL SUMMARY

Software Engineer with 2 years of hands-on production experience architecting, developing, and maintaining high-performance web applications, internal systems, and digital platforms. Highly proficient in JavaScript/TypeScript (React, Next.js, Node.js, NestJS) and backend RESTful API architecture paired with relational databases (PostgreSQL, MySQL). Experienced integrating third-party services, implementing Redis for in-memory caching and session performance, and containerizing microservices for cloud deployment (Docker, Google Cloud Platform / GCP Cloud Run & Cloud Storage). Strong problem solver who writes clean, maintainable code backed by rigorous automated testing (1,800+ test cases) and thrives collaborating with cross-functional teams in fast-paced environments.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3 / Tailwind CSS, PHP 8+
Backend & API Engineering:	Node.js, NestJS, Express, RESTful APIs, Third-Party Service Integration, Microservices, Role-Based Access Control (RBAC)
Databases & Caching:	PostgreSQL 16, MySQL, Redis (Caching, Session Management, Latency Optimization), Prisma ORM, Schema Design, Composite Indexing
Frontend & CMS / Platforms:	React 18/19, Next.js (App Router), Tailwind CSS, CMS & Internal Admin Portals, Responsive Web Design, Reusable UI Components
Cloud & DevOps (GCP/Docker):	Google Cloud Platform (GCP Cloud Run, Cloud Storage, Cloud SQL), Docker & Docker Compose, Git / GitHub (1,940+ Commits), Linux/VPS, Nginx (HSTS/CSP)
Testing & System Quality:	Automated Testing (Jest, PHPUnit, Pest - 1,800+ Test Cases), System Troubleshooting & Debugging, Application Performance Tuning, Code Review

PROFESSIONAL EXPERIENCE

Software Engineer (Full-Stack & Systems Architect) **2024 – Present**

LP Ma'arif NU Cilacap • Central Java, Indonesia

- Architect, develop, and maintain high-traffic web applications, digital administrative platforms, and internal business systems for 270+ institutions, 2,000+ staff, and 17,000+ users.
- Design and deploy secure RESTful API endpoints and third-party integrations (isolated cloud file storage S3/GCP, batch document generators, and automated webhook notification dispatchers).
- Model normalized relational database schemas in PostgreSQL and MySQL with composite indexes, foreign key constraints, and multi-tenant scoping; optimized query latency and transaction concurrency.
- Implement Redis caching strategies for frequently accessed database reads, session management, and system response time optimization.
- Troubleshoot complex technical issues, resolve production bottlenecks, remediate application security guards (SEC-001–004), and containerize services with Docker for scalable cloud deployment.
- Enforce exceptional code maintainability and reliability by executing 1,822 automated test cases (100% pass rate, 36,983 assertions) and maintaining structured Git version control workflows.

SELECTED SOFTWARE ENGINEERING PROJECTS

SIMMACI — Enterprise Digital Platform & Governance System *React 19, TypeScript, Node/REST API, PostgreSQL 16, Tailwind CSS, Redis Caching, Automated Testing*

Repository: github.com/ayebe51/simmaci

- Engineered a full-stack digital platform centralizing institutional data, document synthesis, and administrative workflows across 270+ organizations with dedicated multi-tenant isolation.
- Integrated cloud storage (S3/Cloud Storage) for dynamic media/file archiving, batch document templating, and 1,822 automated test cases ensuring zero-regression releases.

Kiro ERP — Omnichannel Inventory & Real-Time Management Web App *React 19, NestJS, TypeScript, PostgreSQL, Prisma ORM, Redis, Apache ECharts*

Live Demo: inventory-pos-hazel.vercel.app | Repository: github.com/ayebe51/inventory-pos

- Built an internal retail management web app with sub-second POS cashier transactions, multi-warehouse stock replenishment, and live analytics dashboards using Apache ECharts.
- Engineered an append-only transaction ledger on PostgreSQL enforcing WAC/FIFO stock valuations and automated 3-way procurement matching (PR/PO/Goods Receipt).

Koneksi Santri — Integrated Digital Portal & Mobile Ecosystem *Next.js 14, TypeScript, NestJS, PostgreSQL, Prisma, Docker, Webhooks*

Live Demo: admin.koneksisantri.tech | Repository: github.com/ayebe51/koneksi-santri

- Architected a responsive Next.js 14 web superadmin and mobile API ecosystem managing digital wallets, periodic automated tuition billing, and QR security checkouts.
- Integrated third-party webhook notification gateways and containerized the backend services with Docker Compose for seamless cloud provisioning.

EDUCATION & QUALIFICATIONS

Bachelor's Degree (Sarjana Hukum - S.H.) — Islamic Economic Law Graduated 2019

STAI At-Tahdzib Jombang • East Java, Indonesia

Strong foundation in analytical reasoning, problem solving, and contract/business logic, transitioning into autonomous software engineering through rigorous autodidactic mastery and continuous learning.

CERTIFICATIONS & CREDENTIALS

Spec-Driven Development dengan Kiro April 2026

Dicoding Indonesia (Dicoding Academy) • ID: EYX4Q03J6PDL

Verified competence in Spec-Driven Development (SDD): structured technical specifications, contract-based API design, and automated test-driven system reliability.
